

PDF-QA Test Document

This is a test PDF generated by the ingest_pdf.py script.

Artificial Intelligence and Machine Learning are transforming industries. Large Language Models (LLMs) like Gemini, GPT-4, and Claude can understand and generate human-like text with remarkable accuracy.

Retrieval-Augmented Generation (RAG) combines the power of vector search with LLM generation to produce grounded, factual answers from documents.

ChromaDB is an open-source embedding database that stores text vectors and enables fast similarity search over millions of chunks.
